About US

Welcome to **OmniaVerse** and the **Apex blockchain**! We've developed our ecosystem with gamers, creators, and artists in mind. We are building an experience that seamlessly weaves together **Web3** with gaming, art, collectibles, and much more. We are confident that as **blockchain technology** is further embraced by big industry, it will play a critical role in the future of gaming and in how we interact with technology and the arts.

“With an estimated **3.2 billion+ gamers** in the world, we strongly believe that Web3 gaming will onboard the next massive wave of crypto users... Established gaming powerhouses are even starting to come around, with Fortnite creator Epic Games now allowing NFT based games into its game store. It will take some time for this sector to mature, but it’s growing increasingly clear that **blockchain gaming** will be a massive category in the future.”

— **Coinbase Ventures**

Future

The **OmniaVerse platform** enables **creation** and **integration** of **NFTs** into gaming environments, including many mainstream games which support .glb files and apps on the **Meta Oculus**. **Game-agnostic NFTs** are a literal game changer, and we are bringing them to life. Users can **create, mint, stake, and sell** digital objects (skins, pets, weapons) and bring them with as they explore the **OmniaVerse**. **\$OMNIA** is used in conjunction with the **\$BLOCK** and **\$BRICK** tokens for various features

DApp

We have placed a lot of focus on our **DApp**, which is fully operational. It enables purchasing, swapping, and staking of the **\$OMNIA**, **\$BLOCK**, and **\$BRICK** as well as staking for partners tokens. Other features include **p2p**, **betting**, and **Twitch integration** with many more coming soon. The DApp serves as the gateway to the **OmniaVerse** and is easy to use from any wallet browser (e.g. Trust, MetaMask, and others). We are also soon releasing an **OmniaVerse app** on the **Google Play** and **Apple Store** that will provide even easier access to the ecosystem!

Subscriptions

- Enables **owning** property within different platforms (e.g. oculus etc).
- Used in conjunction with **\$BRICK** for owning a business.
- **Build, Mint, and Sell** structures, characters, add-ons, and entire worlds as **NFTs!**
- Available to **BUY** or **RENT!**

Web3 Games

Our first Web3 enabled mobile game, **CYBORNE**, launches **August 25th** and will be the first of many in-house developed games. **CYBORNE** is a battle royale style game in which players can equip their characters with functional **NFTs**. There will be regular tournaments which will yield **\$OMNIA** or **\$BLOCK** for the winners. **OmniaVerse** has a number of other Web3 games under active development.

NFTs

- In-game utility and linked to **\$BLOCK** for selling on OpenSea.
- Includes **Lion OmniaVore Loyalty NFTs**, Utility **NFTs** (in-game), flagship/unique collector's items, and many more to come!
- **Game-agnostic NFTs** (games that support .glb files + various Meta Oculus games)

Vision

We are taking the best of crypto, improving it, and expanding. We have resolved issues with existing platforms to ensure the best possible experience for our users. We believe creators should be rewarded for the time they invest. We also believe that **OmniaVerse** and **Web3** are the future of gaming and so we have built the **Apex Blockchain** to support that vision. It is at pivotal moments like this that history is made, and **OmniaVerse** will be paving the way.
